

:IUFOPRA INFORMATION NETWORK NEWSLETTER:

Jan/Feb, 1996.

Vol,1 - Issue 13.

The IUFOPRA INFORMATION NETWORK would like to wish all their members, friends and colleagues a very happy and peaceful 1996. On January 28th, 1995, the Wold Lake Vicinity of Muskegon, Michigan, was the scene of yet more UFO sightings. Residents of the area reported a flap of UFO sightings during March of 1994 which were backed up by Radar confirmations from the local U.S. Weather Service Office. A local reporter says the current sightings are on a much smaller scale, involving "about a dozen" witnesses who, within an hour, saw intense, rotating lights in the night sky. Skeptics claim that the witnesses were actually seeing nothing more than the close approach of the planet Mars. The reporter, who works for the local paper, the *Muskegon Chronicle*, says the paper often receives UFO reports, and that the current sightings were not linked with what happened in 1994. **CIA DOCUMENTS LINKED TO MARILYN CONSPIRACY:** A purported CIA Document claims that UFOs are linked to the "Marilyn" Conspiracy. A private L.A. Detective claims to have evidence that Marilyn Monroe was murdered because on the day that she died (according to the CIA Document) she was going to hold a Press Conference to spill the beans about JFK's secret knowledge of UFOs and dead Aliens.

Sources have revealed that the one page document briefly summarizes contents from wiretaps of telephone conversations between a reporter and her friend, and between Monroe and Robert Kennedy. At one point in their conversation, the reporter purportedly made reference to Roswell Crash. At the top of the document are the words "Moon Dust", which has now been confirmed as the U.S. Military's bonafide code name for its crashed spacecraft recovery programme, unless this has changed since. It has also emerged that apparently all U.S. Presidents from Eisenhower (with the exception of Jimmy Carter) onwards were aware of the Roswell Crash. As they were all briefed on the incident, then it is more than likely that the U.S. President (of the time) did visit the Crash Site. It also seems that the signature at the bottom of the document is valid but it must be said that recent new evidence has established that it is not. Also the words "New Mexico" which is largely unreadable can be seen in the circulated copy of the document. This appears to link it with the Roswell Incident. If this document is real then it is obvious that the CIA will deny that it exists at all, and if they decide that it is a forgery or disinformation, they probably won't act on it and once again we will be faced with the usual "cover-up and conspiracy of silence" tactics of this Organization and will probably never know the "Real" story behind this document.

PS:-X-Files back this Month, BBC1 at 10pm, Tuesdays.

O MY DARLING CLEMENTINE! :

Some years ago former President Ronald Regan's Strategic Defense Initiative Program (more popularly known as STAR WARS) was scaled down, readjusted and renamed. As a result of this S.D.I. became BMDO - Ballistic Missile Defence Organization. BMDO lives on and enables such high-tech Space technology as the CLEMENTINE MISSION, which will photograph the Moon and scrutinize it for the first time since the Apollo Mission. Also for the first time, the surface of the Moon has been completely photographed and put into all digital format. The retrieval of this valuable Moon data was not the Mission's primary goal however. NASA's role in all this interfaces delicately with that of BMDO: Clementine is one of these dual space Missions kept somewhat secret because of Military interests on abroad. Public interest in the accumulated photographic data is inevitable. So far over 2 million images were retrieved; with 1.6 million of these images made available on the INTERNET. The Master copy is with Nasa. According to both NASA and the Department of Defence, the spacecraft Clementine was launched in January of 1994 as part of a joint mission by the two Agencies, furnished with newly developed sensors and camera equipment that would give higher resolution images of the Moon - which is NASA's contribution to the project. Although NASA is involved in this mission, it is the DOD who has sponsored, funded and managed the Mission. Clementine's chief purpose is to test new sensors and map the Moon. It was intended that Clementine would proceed on to the Van Allen Radiation Belt after leaving lunar orbit. Unfortunately, in the spring of 1993, it suffered a malfunction forcing part of the Mission to be cancelled. Apparently this was caused by one of its motors misfiring, which basically expended the fuel, and in effect, rendered the inability to exert control over the craft anymore. The recently developed Sensors were tested, and its lightweight and miniature imaging Sensors and components are technologically designed for use on the next generation of DOD Spacecraft. The purpose of the DOD experiment was to see how well the Sensor equipment would hold up in the kind of system that the Clementine employs. Clementine has also discovered a very deep crater at the Moon's South Pole. There seems also that there could be some evidence of ice, but at present there is no knowledge as to whether or not it's there, but any data that is available will be continuously analyzed.

APOLOGIES:

We would like to apologise for the long delay in the appearance of the Winter Issue of the IUFOPRA INFORMATION NETWORK JOURNAL. This was due to technical problems with our computers over the past few weeks. Happily these have now been resolved but it left it too late to dispatch them before Christmas so they are presently being despatched and you should receive your copy very shortly.

23/4-96

ROSWELL COMMENT:

The American President Bill Clinton during his visit to our fair Isle, and while in Belfast was asked a question by a young man about the Roswell Incident. In reply to the young person's question and with a friendly smile, the President denied knowledge of it. "Oh Me ! Oh My! Now come come Mr President, pull the other leg." Read about this in detail in our Summer (June) issue of the Journal.

PARANORMAL UPDATE:-

Another amazing Miracle has come to IUFOPRA'S notice. The Holy Virgin of our Creator has done it again. A tiny Convent in Toulouse, in France, have hanging on their wall a centuries old painting of the Virgin Mary holding the Infant Jesus in Her arms. The amazing story about this picture is - Alling pilgrims from all over the world to Toulouse to worship devoutly before this painting of the Blessed Virgin that weeps real tears - and talks !

The ancient painting made headlines about two years ago when word of its miraculous powers spread beyond the town of Toulouse, where it hangs in the convent of the Sacred heart chapel.

Since then, hundreds of men, women and children swear it has cured their illnesses after speaking to them in an angelic voice.

"The voice is sweet and soft," said a convent nun who has heard the weeping Virgin speak to many of the people who kneel beneath the painting. "The miracles usually take place after those who have heard the voice have returned to their homes. The painting of the Virgin in itself is a miracle. The tears that stream from her eyes are real. The painting has been carefully examined by religious experts, as well as by three art experts from the Louvre in Paris. None can explain the origin of the tears and the voice." The Mother Superior said the painting was in a convent storeroom when she first arrived in 1947. It was later hung in the chapel where it has remained ever since. To mention but one - A 16 year boy, Paul Mellour, from Bordeaux paralyzed from the neck down after a fall from his bicycle, stunned his doctor when he walked into his office eight days after his visit to the shrine.

IUFOPRA JOURNAL & NEWSLETTER:

To all our Members and Exchange Groups. We regret our Issues of the IUFOPRA JOURNAL will now be issued twice yearly, that is, January and June of each year. This due to the high cost of getting multiple printed

Issues out. We are also limiting our IUFOPRA NEWS-LETTER output to one every three months, that is January, April, July and October. But, do not fear, we will have more pages added to both Issues.

CAMPAIGN FOR NEW MEMBERS:

Our Public Relations Officer, Carl Nally, is going all out to campaign for new members for IUFOPRA. Watch out for details on your Cablelink. International UFO Organizations take note. United Membership, 500. There are 400 vacancies.

ANNUAL SUBSCRIPTION:

Our C\Director is also considering in reducing the Annual Subscription from £12 to £6 per yr. This has yet to be put before the Committee in the near future. The more members we have the more we can reduce our Subscriptions.

EXTRA-TERRESTRIAL DOCTOR:

A report has come to our notice of a miracle cure by an Alien doctor of a Detroit USA business woman, now 45 years old. It all started when she was 4 years old. She was the victim of Hepatitis. Her Alien experiences came to light when she submitted herself to Hypnosis by a famed UFO Investigator, Doctor Stephen Dherky, a Hungarian. - MORE ABOUT THIS IN OUR SUMMER (June) EDITION OF OUR JOURNAL.

REST IN PEACE:

Our Deepest Sympathy goes out to our Director of Investigations, Jenny Randles (England) who's Dear Father passed away in the latter part of 1995.

R.I.P. (Sympathy card was sent on behalf of the Committee and Members).

THANK YOU SINCERELY:

The Directors and Committee of IUFOPRA would like to thank all our friends here in Ireland and all over the world who sent us beautiful Christmas cards for the Festive Season, 1995. We were not expecting this. We hope to make up for it in 1996. TO ALL OF YOU, AND A HAPPY NEW YEAR.
